

# Private Label Digital Signage for Resellers and Integrators

Create your custom Digital Signage Platform with the unique specialist on the market

Selling third-party software is chaotic because you face some problems like:

Many competitors with same brand

Low-protection for on-going deals

Standard market offer

To solve these problems, start to sell your Private Label Digital Signage and get:

No competitors with your brand

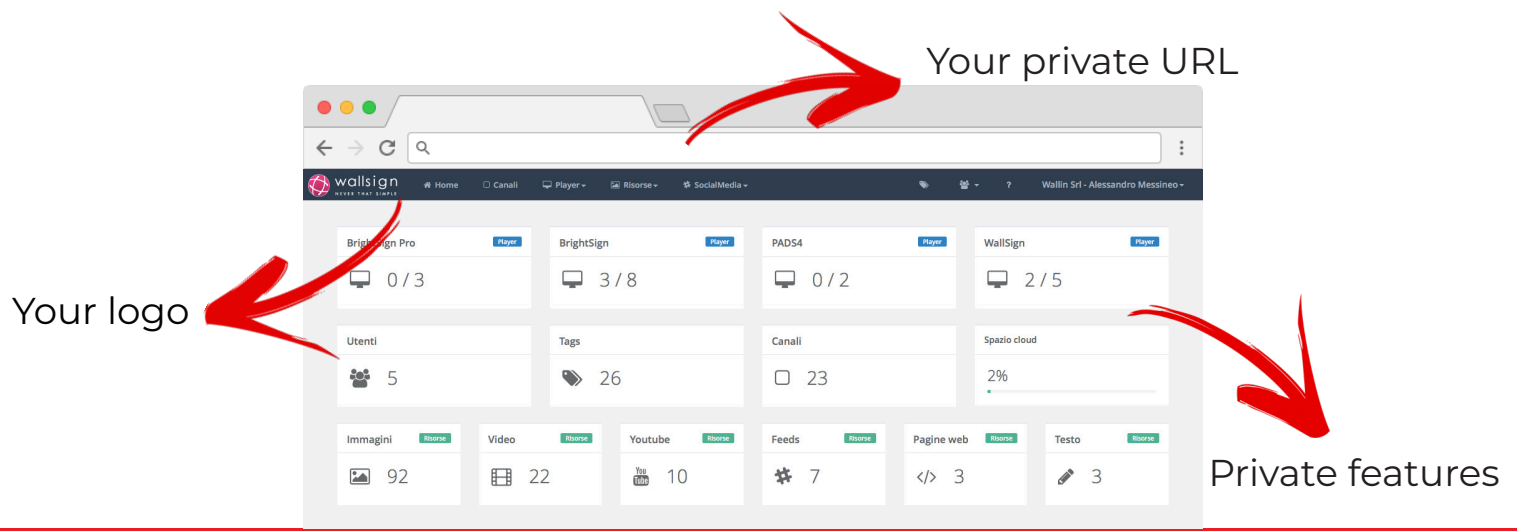

Full-protection for on-going deals

Custom price and unique offer

SPECIAL OFFER ISE 2018

Get your PRIVATE LABEL at our Booth #8-C312

We offer two platforms in private label for a broad range of digital signage deployments

## Automated Digital Signage for Small Business

The only Digital Signage Platform based on Artificial Intelligence.

Wallin ONE turns any information from the web and social into beautiful content, removing the need to generate or acquire content for Digital Signage.

The platform is built on ever-growing Intelligent Apps like Social Wall, TripAdvisor, News, and so on, giving users a range of available content options not available with other platforms.

## Multi-platform Digital Signage CMS for Retail

The Digital Signage CMS built for Retail to manage large, multi-manufacturer player networks.

WallSign is player-agnostic, meaning that it supports a wide range of digital signage players and OS including BrightSign, NDS PADS4, Android, Windows and Linux.

Among its capabilities are the ability to define and apply tags on the fly to players, channels, media and more to simplify the management of screens on any retail.
